*SWORD I - Reference Analogue Audio Interconnect Cable with 12 insulated conductors, 6 conductors are wound clockwise, 6 are wound counter clockwise and allows perfect velocity over the whole frequency range. This way of strand orientation, efficiently counteracts negative electrical interference giving all audible frequencies uniform transmission conditions and no open window for degrading noise to enter. That is what distinguishes a really transparent cable. Additional meters on request.*

*PHONO 2RCS-CS is a dual channel connection between a turntable and a RIAA phono stage or a receiver with a dedicated phono input including the Earth Link. Supra Phono's low capacitance and carbon/nylon shield, its noise interference immunity, make a dead silent cable suitable for low output moving coil cartridges. Further the low capacitance allow for best transient response, without damping or slowing down the musical beat.*

## Digital RJ45 Ethernet interconnect cables

*CAT 8 is used advantageously in TCP/IP and UDP application where correct data information is critical, e.g. 4K and 8K video streaming, high quality music streaming, gaming, data centers and in-building installations. By upping the performance 4 times to 2000MHz you are more likely to have no incorrect data being sent or not being corrected by applications in time as there is much more bandwidth to work with. This can be very important to avoid for example video loss in streaming or avoiding stuttering in music streaming and voice communication.*

## USB 2.0 Type A-B High Speed (USB 3.0 is dual-link not used for USB Audio)

*For digital audio convertors, music streaming from computers, multimedia players, among other devices providing a USB interface. There is a great need for better cables since the failed bit transmissions will undoubtedly be detected when listening to your music, since the error correction and number of re-tries will leave audible traces. The trick is, as always, shielding, separate for each pair of leads correctly twinned and an exact impedance matching of 90ohm, which is vital for these applications. SUPRA USB 2.0 will reward you with a dynamic, rich and detailed music experience.*

## DisplayPort DP-DP

*DisplayPort is an interface for computer graphics which now reaches also projectors and begin to include TV sets. Our Supra proprietary 24K goldplated connectors are robust and incorporates a locking mechanism. The highly appreciated and proven Supra HD5/slim cable provides for lightning-fast, well shielded and accurate signal transmissions allowing any graphics to perform at its best. All features of the DisplayPort interface is incorporated in our new cable and we are proud to now being able to supply photographers, film makers, 3D artists, drawing engineers, computer gamers, etc, a cable that will not slow down or blurr video or pictures.*
